Principais competências

REST APIs

Debugging

Amazon Relational Database Service (RDS)

Languages

Inglês (Full Professional)

Português (Native or Bilingual)

Certifications

Primeiros passos para desenvolvimento web

AWS Academy Graduate - Cloud Foundations - Training Badge

Liderança, Capacidade de Aprender e Resiliência

Capacita+: Construa com o Gemini

Introduction to Data Science

Honors-Awards

Estudante

Matheus Sá Cardoso

Full-Stack Engineer | Software Engineer | .NET | C# | SQL | AWS | Python

Salvador, Bahia, Brasil

Resumo

Professional Summary2+ years of professional experience in Software Engineering, Full-Stack Development:- Web application using Outsystems, AWS (S3), MySQL;- Desktop Application using C#, .NET, WPF and REST APIs;- PLC Hardware-Software Integration (Beckhoff CLPs via ADS protocol, Arduino, CNC machines) and custom IHM widget development;- Technical analysis, system modeling (ERD), and Agile workflow documentation;- International work and research experience in Aachen, Germany (Fraunhofer IPT);2+ years of work experience in Data Analysis, Machine Learning and Research;- Data Engineering & Pipeline Automation: using Python, R, Java (Selenium) and REST APIs (ANBIMA, Fredr); - Data Visualization & Business Intelligence using Power BI, Excel, and R; - Machine Learning & Predictive Modeling for industrial IoT systems, deploying predictive classification models that outperformed human detection by 30%; Bachelor’s degree in Computer Engineering (10th semester - SENAI CIMATEC).I am curious, adaptable, and easygoing. I am always open to new challenges and thrive in collaborative, high-impact technical environments. I really enjoy participating in research initiatives, hackathons, and innovative engineering projects.

Experiência

Fraunhofer Institute for Production Technology IPT

Full-Stack Developer

fevereiro de 2025 - fevereiro de 2026 (1 ano 1 mês)

Região do Aquisgrana, Renânia do Norte-Vestfália, Alemanha

- Developed API endpoints in C# .NET to fetch data from the Beckhoff PLC via the ADS protocol.
- Implemented HMI features, resolved bugs, and built custom WPF widgets for bulk parameter reading and writing following MVVM and CQRS architecture.
- Refactored profile hashing and role-based widget permissions, securing user profile features against unauthorized access.

- Built an end-to-end automated test environment using FlaUI, Git, and GitLab to validate HMI workflows.
Tech Stack: C# | .NET | WPF | Git | GitLab | FlaUI | TwinCAT 3

PetroReconcavo
Full-Stack Developer
abril de 2024 - novembro de 2024 (8 meses)
Salvador, Bahia, Brasil

- Transformed manual workflows (Google Forms, Drive, Outlook) to a centralized reactive web application using OutSystems.
- Designed Entity-Relationship Diagrams (ERDs) and built robust CRUD operations to manage assets and processes for over 7000 reports.
- Integrated MySQL relational database with AWS S3 to store images and utilized a tool to compress images to optimize storage.
- Wrote technical documentation and manual of how to use the software to over 2000 employees.
- Designed business and systems requirements with stakeholders using Kanban (Trello).

Tech Stack: OutSystems | Amazon S3 | MySQL | Javascript | HTML | CSS

Fundação ECOS
Data Analyst
abril de 2023 - março de 2024 (1 ano)
Salvador, Bahia, Brasil

- CPA-20 Certified (Anbima)
- Developed a weekly financial report using R and Excel to track key macroeconomic indicators.
- Developed an automation tool to identify debts in more than 300 pdf documents using Java and Selenium.
- Integrated ANBIMA and Federal Reserve (Fredr) REST APIs for gathering data to real-time updates with R in reports to assist asset management and investment decision-making.

Tech Stack: R | Excel | Java | Selenium | Quantum

Formação acadêmica

SENAI CIMATEC

Bachelor of Engineering, Computer Engineering · (janeiro de 2021 - dezembro de 2026)

RWTH Aachen University

Bachelor of Engineering, Mechanical Engineering · (janeiro de 2025 - janeiro de 2026)
